Fiberglass Cloth

Style:

35 oz
Vermiculite Coated

General Description:

Fabric is woven from 100% Fiberglass yarn with treated with a coating of Vermiculite on both sides for enhanced flame resistance and high temperature protection.

Physical Properties:

Weight:	35 oz / sq yd
Construction:	Warp - 10 Fill - 8
Weave:	Plain
Thickness:	.060"
Temperature:	1200°F (650°C) Continuous 1500°F (820°C) Intermittent
Tensile Strength:	Warp - 470 lbs Fill - 250 lbs

Chemical Resistance:

Resists Most Acids Alkalies and Solvents, with the exception of Hydroflouric Acid and corrosive Environments at elevated temperatures.

Applications:

Safety apparel, Fire Blankets, Curtains, Safety Barriers, Heat Insulation Pads, Stress relieving pads, Pipe wrap.

Availability:

50 Yards/Roll
40" & 60" Wide
